STATEMENT REGARDING UNAUDITED FINANCIAL INFORMATION

The unaudited financial information set forth above is subject to adjustments that may be identified when audit work is performed on the Company's year-end financial statements, which could result in significant differences from this unaudited financial information.

NON-GAAP FINANCIAL MEASURES

In evaluating our business, we consider and use certain non-GAAP measures, including primarily adjusted EBITDA and adjusted net income/(loss), as supplemental measures to review and assess our operating performance. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. We define adjusted EBITDA as income from operations (which excludes interest income, income tax benefit and expense and depreciation and amortization expenses) excluding share-based compensation expenses and adjusted net income/(loss) as net income/(loss) excluding share-based compensation expenses. We define adjusted SG&A as expense excluding share-based compensation expenses. We incurred share-based compensation in the 2016 fiscal year only, which was associated with the acquisition of Mr. Jerry He's equity interests in Impetus in January 2016.

We present the non-GAAP financial measures because they are used by our management to evaluate our operating performance and formulate business plans. Such non-GAAP measures, including adjusted EBITDA and adjusted net income/(loss), enable our management to assess our operating results without considering the impact of non-cash charges, including depreciation expenses and share-based compensation expenses, and without considering the impact of non-operating items such as interest income and income tax benefit and expenses. We also believe that the use of the non-GAAP measure facilitate investors' assessment of our operating performance.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using these non-GAAP financial measures is that they do not reflect all items of income and expense that affect our operations. Interest income, income tax benefit and expenses, depreciation expenses and share-based compensation expenses have been and may continue to be incurred in our business and are not reflected in the presentation of these non-GAAP measures, including adjusted EBITDA or adjusted net income/(loss). Further, these non-GAAP measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited.
