"We have delivered our fifth consecutive quarter of solid revenue growth, underpinned by the disciplined execution of strategies to drive organic and acquisitive growth," said Jerry He, Bright Scholar's Chief Executive Officer. "Our focus on delivering a premium education enables students to achieve academic excellence and the rate at which they are admitted to top universities and schools continue to grow beyond our expectation. In addition to the outstanding achievements of the graduating class from our international schools with 90% of our students having received offers from global top 50 institutions, we recently received our students' 2018 Zhongkao (China's high school entrance exam) results and 80.3% of grade 9 graduates from our bilingual schools have been accepted into top public high schools in their respective regions."

"We continue to strengthen our market leading position through the execution of our growth strategies, as demonstrated by the recent completion of four acquisitions. The acquired five kindergartens from Wuhan Qiaosheng Education Investment Company ("Xinqiao") will join our expanding nationwide network, providing quality early year education to our youngest students. In addition, we have completed the transactions of three strategic acquisitions to expand our service offerings in the complementary education service segment. Bright Scholar now owns a 70% equity interest in Can-achieve Education Consultants Co., Ltd. ("Can-achieve"), a China-based education consulting business which represents over 600 prestigious overseas universities in the US and Canada; a 75% equity interest in Foundation Global Education Limited ("FGE"), a Hong Kong-based education consulting company for overseas boarding schools and universities as well as a 51.67% equity interest in Guangzhou Zangxing Network Technology Co., Ltd ("Zangxing"), an education technology company based in Guangzhou, China. The transactions related to FGE and Zangxing were completed on June 1, 2018. We are delighted to welcome these companies into our expanding Bright Scholar family, and are now working hard to integrate these businesses to capitalize the synergies with our existing schools."

"Factoring in the revenue contributions from the acquisition of Xinqiao & Can-Achieve, the revenue for the third fiscal quarter was RMB540.9 million, representing a year-over-year increase of 33%, and for the nine-month period, revenue was RMB1,329 million, representing a 26% year-over-year increase. In light of these acquisitions, we have updated the financial guidance for the full fiscal year 2018 to include revenues from existing business and investments with new guidance representing a year-over-year growth of 26% to 28%."

"In addition to the completion of the above strategic acquisitions, we recently announced that Bright Scholar has signed an agreement to acquire a 70% equity interest in a renowned Zhejiang-based art training institution for a total consideration of RMB70 million. The institution specializes in preparing students for college entrance exams relating to media and communication as well as music and performance studies. Founded in 2009, the institution has two main campuses with over 600 students, delivering a revenue of RMB23.7 million and EBITDA of RMB9 million in 2017. We believe this strategic investment will further expand our service offerings and help more students enroll in their desired art colleges.

"We are also pleased to report that our long-term collaboration with Country Garden Holdings Company Limited has continued to deepen. As of July 17, 2018, we have signed contracts to operate 12 kindergartens within Country Garden properties with a total full capacity of 3,420 students. This impactful relationship provides us with a strong pipeline for expanding our nationwide network and allows a high visibility of revenue as we continue to build scale."

"As of May 31, 2018, our average student enrollment⁽⁵⁾ was 35,275, representing a year-over-year growth of 19.1% as compared to that of May 31, 2017. We are proud of the progress we have achieved and the consecutive quarterly growth results continue to demonstrate our commitment to accelerating

Translations of balances in the condensed combined and consolidated balance sheets, and the related condensed combined and consolidated statements of operations, and cash flows from RMB into U.S. dollars as of and for the quarter and nine month period ended May 31, 2018 are solely for the convenience of the readers and were calculated at the rate of US\$1.00=RMB6.4096, representing the noon buying rate set forth in the H.10 statistical release of the U.S. Federal Reserve Board on May 31, 2018. No representation is made that the RMB amounts could have been, or could be, converted, realized or settled into US\$ at that rate on May 31, 2018, or at any other rate.

NON-GAAP FINANCIAL MEASURES

In evaluating our business, we consider and use certain non-GAAP measures, including primarily adjusted EBITDA and adjusted net income/(loss), as supplemental measures to review and assess our operating performance. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. We define adjusted EBITDA as net income/(loss) excluding interest income, net; income tax expense/benefit; depreciation and amortization; share-based compensation expense and non-recurring foreign exchange gain/loss (included in other expenses) due to the movement of the cash denominated in USD at a PRC subsidiary level which is reserved for designated purpose of use in near future and adjusted net income/(loss) as net income/(loss) excluding share-based compensation expense. We define adjusted SG&A as selling, general and administration expense excluding share-based compensation expense and adjusted operating income/(loss) as net operating income/(loss) excluding share-based compensation expense. Additionally, we define adjusted net earnings per share attributable to ordinary shareholders, basic and diluted, as adjusted net income/(loss) attributable to ordinary shareholders (net income/(loss) to ordinary shareholders excluding share-based compensation expense) divided by the weighted average number of basic and diluted ordinary shares or American depositary shares (each an "ADS"), each representing one Class A ordinary share of the Company, on an as-converted basis.

We present the non-GAAP financial measures because they are used by our management to evaluate our operating performance and formulate business plans. Such non-GAAP measures, including adjusted EBITDA and adjusted net income/(loss), enable our management to assess our operating results without considering the impact of non-cash charges, including depreciation and amortization and share-based compensation expense, and without considering the impact of non-operating items such as interest income, net; income tax expense/benefit and non-recurring foreign exchange gain/loss (included in other expenses) due to the movement of the cash denominated in USD at a PRC subsidiary level which is reserved for designated purpose of use in near future. We also believe that the use of the non-GAAP measure facilitates investors' assessment of our operating performance.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using these non-GAAP financial measures is that they do not reflect all items of income and expense that affect our operations. Interest income, net; income tax expense/benefit; depreciation and amortization; share-based compensation expense and non-recurring foreign exchange gain/loss (included in other expenses) due to the movement of the cash denominated in USD at a PRC subsidiary level which is reserved for designated purpose of use in near future have been and may continue to be incurred in our business and are not reflected in the presentation of these non-GAAP measures, including adjusted EBITDA or adjusted net income/(loss). Further, these non-GAAP measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited.
